

PABLO THIAGO MAGALHÃES

Senior Front-End Engineer

Brazil (Open to Remote) | English (C1)

thiago22magalhaes@gmail.com | linkedin.com/in/thiogomagalhaesme

SUMMARY

Senior Software Engineer with over 10 years of experience delivering robust, scalable, and high-performance web and mobile applications. Specialized in React, Next.js (SSR), Tailwind CSS, GraphQL, and TypeScript. Adept at creating intuitive, pixel-perfect interfaces, optimizing for SEO and Core Web Vitals, and architecting systems from scratch. Strong exposure to Python/Django for backend services, with a solid foundation in full-stack development. Passionate about building meaningful digital products and thriving in collaborative startup environments.

WORK EXPERIENCE

The Walt Disney Company, Software Engineer | P3 UI Eng **Dec 2025 - Present**

- Collaborate closely with product and project management to translate requirements into technical specifications, timelines, and scalable frontend solutions in partnership with other engineering teams.
- Develop, maintain, and improve high-quality user interfaces with a strong focus on React, Next.js, TypeScript, code quality, and test-driven development.
- Contribute to application architecture, coding standards, maintenance practices, and software lifecycle support while keeping technical documentation clear and current.
- Support and mentor developers through code reviews, knowledge-sharing, and technical guidance; review pull requests to ensure product, design, and engineering standards are met.

Radix, Full Stack Engineer **Jun 2024 - Dec 2025**

- Contributed to scalable, high-performance web applications using React, Next.js, Node.js, GraphQL, and Laravel to build and maintain robust end-to-end solutions.
- Worked on an international project for Celanese, collaborating with cross-functional teams across different time zones and communicating effectively with stakeholders.
- Developed RESTful and GraphQL APIs serving web and mobile clients, with integrations to legacy systems and third-party services.
- Improved SEO and performance for production-grade Next.js applications.

Fiorde Logística Internacional, Senior Software Engineer**May 2023 - Jun 2024**

- Created logistics dashboards and internal tools with React, Next.js (SSR), Tailwind, and TypeScript.
- Integrated GraphQL APIs and REST endpoints; improved UI performance and data efficiency.
- Designed and maintained Cypress E2E tests and CI/CD pipelines using AWS.
- Delivered pixel-perfect, fully responsive components with performance and accessibility in mind.

Abbott Internacional USA, Senior Software Engineer**Jun 2022 - May 2023**

- Developed React Native mobile apps using Styled Components for UI theming.
- Built scalable APIs and microservices in Go and Node.js, integrating with healthcare APIs.
- Maintained strong test coverage with Jest; implemented WebView integration and optimized mobile UX.

Grupo RD Saúde, Senior Software Engineer**Mar 2022 - May 2022**

- Developed dynamic eCommerce modules for Raia/Drogasil using Next.js (SSR), React, and Tailwind.
- Improved SEO, CLS and LCP metrics through architectural optimization.
- Created feature-rich APIs using NestJS; ensured test automation with Cypress and Jest.
- Maintained unified React Native codebase for iOS and Android platforms.

Kognitus, Senior Software Engineer**Apr 2019 - Mar 2022**

- Led the frontend team in the development of a Machine Learning-powered analytics platform for the oil and gas industry using React, Redux, and Redux-Saga, delivering real-time dashboards and insights for engineering teams.
- Collaborated with data scientists and backend engineers to integrate predictive analytics models into the frontend, contributing to faster anomaly detection and data-driven decision making.
- Implemented performance optimizations, state management patterns, and responsive visualizations tailored for technical users in high-complexity domains.
- Led the development of a scalable React-based architecture from scratch and integrated real-time API layers with asynchronous flow control using Redux-Saga.
- Designed reusable, modular UI components with accessibility and performance in mind; participated in code reviews, mentoring, and cross-functional agile rituals.
- Tech Stack: React, Redux, Redux-Saga, TypeScript, SCSS, REST APIs, Python (Flask backend), AWS EC2.

The Martians, Software Engineer Denmark / Freelancer**Nov 2018 - Mar 2019**

- Developed a React and GraphQL dashboard used to manage a mobile training application for employees of the Coca-Cola Europe group.

Raaziz Digital, Senior Software Engineer / Tech Leader

Oct 2017 - Oct 2018

- Built a modular custom CMS using PHP, JavaScript, and HTML/CSS.
- Delivered accessible and responsive designs, acting as tech lead with direct client collaboration.

Devign, Software Engineer

Mar 2016 - Oct 2017

- Built hybrid mobile and web apps using AngularJS and Ionic.
- Developed component-based architecture in PHP and HTML5, optimized for SEO.
- Ensured compatibility across mobile/desktop with performance-optimized layouts.

Storm Security, Software Engineer

Feb 2014 - Mar 2016

- Developed streaming portals for Globo using JavaScript, HTML/CSS, and Python (Django/Flask).
- Integrated REST APIs for video playback and device-based rendering.
- Applied frontend optimization strategies for high-traffic and low-latency experiences.

EDUCATION

Bachelor's in Information Systems

Jan 2008 - Feb 2012

University of Estácio de Sá

- Final CGPA: 3.90

TECHNICAL SKILLS

- | | | |
|---------------------------------------|---------------------------|------------------------------|
| • React, Next.js (SSR) | • Node.js, NestJS, Django | • Cypress, Jest, Git |
| • TypeScript, JavaScript | • Go, Python, Flask | • CI/CD, AWS (EC2), Vercel |
| • Tailwind, Styled Components | • REST, GraphQL | • MongoDB, MySQL, PostgreSQL |
| • HTML5, CSS3, Advanced Responsive UI | • Serverless, API Design | • Webpack, ESLint |
